

MAYANK ARORA

CYBERSECURITY RESEARCHER & SECURITY ENGINEER

themayankarora44@gmail.com | +91 7417944156 | linkedin.com/in/mayank-arora | portfolio-xi-lyart-67.vercel.app

PROFESSIONAL SUMMARY

Cybersecurity-focused Computer Science student with hands-on experience in web application security, vulnerability assessment, reconnaissance, Linux administration, Active Directory, and Windows privilege escalation. Experienced in security testing, vulnerability validation, PoC development, responsible disclosure, attack-surface analysis, and technical security reporting. Interested in offensive security, application security, network security, and security engineering.

TECHNICAL SKILLS

Security & Testing: Penetration Testing, Vulnerability Assessment, Web Application Security, OWASP Top 10, XSS, CORS, CSRF, IDOR, Broken Access Control, Exploitation Testing, Reconnaissance
Tools & Frameworks: Burp Suite, Nmap, Wireshark, Metasploit, Nuclei, Subfinder, Amass, Httpx, Dirsearch
Systems & Administration: Linux Administration, Linux CLI, Kali Linux, Active Directory, Windows Administration, Windows Privilege Escalation
Networking: TCP/IP, DNS, HTTP/HTTPS, ARP, Packet Analysis, Network Traffic Analysis
Security Practices: PoC Development, Attack-Surface Mapping, Vulnerability Validation, Security Documentation, Responsible Disclosure

PROFESSIONAL EXPERIENCE

Redynox | Cybersecurity Intern | Roorkee, India | June 2025 – July 2025

- Conducted security assessments of live web applications, identifying client-side and server-side misconfigurations and weaknesses.
- Tested OWASP Top 10 vulnerabilities including XSS, IDOR, and broken access controls using Burp Suite Professional.
- Performed reconnaissance and attack-surface mapping using Nmap, directory discovery, and asset-discovery frameworks.
- Validated vulnerabilities through controlled reproduction and developed technical proof-of-concept demonstrations.
- Prepared structured security reports with reproduction steps, impact analysis, evidence, and actionable remediation guidance.

SECURITY RESEARCH & RESPONSIBLE DISCLOSURE

- Army School Transfer Certificate Exposure: Identified publicly accessible student transfer-certificate documents/data on an Army Public School web property and pursued responsible disclosure.
- Grievance Escalation Notifications – investuttarakhand.uk.gov.in: Identified an exposed page containing departmental officer information and reported the exposure for remediation.
- Web Security Research: Researched URL spoofing, CORS misconfiguration, information disclosure, and access-control weaknesses in testing and research environments.

PROJECTS & RESEARCH

- LLM Guard – AI Prompt Firewall: Built and assessed an AI security application with a Vite/Node.js frontend and FastAPI backend. Implemented and tested prompt-security controls, request filtering, API security, CORS behavior, authentication, rate limiting, and client-side access-control validation.
- Web Application Security Testing & Vulnerability Research: Built controlled local environments to reproduce cross-origin data exposure and host-header issues. Developed PoCs, analyzed application behavior, evaluated security impact, and documented remediation approaches.
- Network Reconnaissance & Traffic Analysis Framework: Used Wireshark for packet capture and protocol analysis, investigating suspicious markers, handshake anomalies, exposed credentials, and unusual network behavior across selected protocols.

CERTIFICATIONS & TRAINING

- HackZero'26 CTF – OWASP VIT Bhopal (2026)
- Certified Cybersecurity Educator Professional (CCEP) – Red Team Leaders (2025)
- Digital Forensics & Incident Investigation – Red Team Leaders (2025)
- Information Security Awareness (ISEA) – Ministry of Electronics & IT, Government of India (2025)
- MythX National Level Cybersecurity CTF – Threat Hunting & Cryptography (2026)
- Certified Red Team Operations Management (CRTOM) – Red Team Leaders (2025)
- Ethical Hacking & Linux Administration Suite – Udemy (2025)

EDUCATION

Quantum University | B.Tech in Computer Science & Engineering (Cybersecurity) | 2023 – Present

FOCUS AREAS: Application Security • Penetration Testing • Vulnerability Research • Network Security • Digital Forensics
